Published November 1, 2007, Psychogenic non-epileptic seizures (PNEs) are an uncomfortable topic—one that is difficult for both patients and healthcare professionals to discuss and treat. Yet it is estimated that PNEs are diagnosed in 20 to 30% of patients seen at epilepsy centers for intractable seizures. Moreover, in the general population, the prevalence rate is 2.33 per 100,000 making...
